

Eighteen point three

By Todd Andrew Rohrer

Copyright TXu 1-990-315

Please put a perhaps in the front and end of each sentence especially this one.

r/l = l = s = d

re = r/l = s = l or r or l/r

1.5 And all will be afraid, and the Watchers will shake, and fear and great trembling will seize them, up to the ends of the earth. – Book of enoch

This may not have anything to do with “fear” this in fact may be a sort of “control” suggestion. If someone approaches you and lets say they are much bigger than ypoui, there would be a sort of “fear” so this aspect of fear may be a control aspect, and of course on physical level. Some in say a chess tournament may fear an opponent not based on his size but on non physical aspects such as his mental state relat9ve to his mental chess game ability. So for example if there was a warrior and you heard about his record say like the red baron , who had all these kills in plane fighting, and you met him, so there would be a certain amount of “fear” and that would not be fear it would perhaps be respect or reverence. So the above comment may be saying there is a certain amo0unt of respect for these watchers or a certain amount of reverence. Of course that left unchallenged could lead to a dictatorship or a fascist organization person in a group of people has much less pull than a person who was in a group who stands alone. It is like a “fear” to be all alone in a situation, and it seems to be a “smart” choice to be in a

group. But perhaps as the amount of people in a group increases the “fearful mental aspects” of the people decrease. So it could suggest that fear is relative to the size of the group you are in. If you are in a huge group you may be more afraid than if you are all alone/. Of course in this situation being all alone is someone to be rejected when in reality there is no basis for that. It is perhaps a fable. No matter how it is assorted eventually everyone is alone. Everyone will have to face death alone and everyone will have to face situations in life alone no matter how big of a group they are in. If you are in a band or a baseball team, and you do poorly in your execution of a situation then you will see how fast you are alone even in a group. The group will attack you in one way or another if you make the group look bad.. this perhaps plays out also in the wild. There are these aspects that lead to making aspects feel they are in a group when in reality they are all alone. Certainly there are situations one can be in with groups where they feel all alone, even in a school class room, a person can be there and feel miles away and all alone, and so this all alone aspect is determined to be fear or something to avoid. It is perhaps like this equation

G = group

S = single

St +strength

Si = Size of group

$$G + Si = St$$

$$S + Si = St$$

It is perhaps a paradox. The bigger the group then the more strength one has, but it also works the other way the smaller the group the more strength. As the group number increases individual strength or power decreases. As the group decreases individual strength increases. Perhaps the main reason for groups is to make sure no one gets strong. In a group an individual's options are limited and as the group increases the limits are larger and larger until in a huge group an individual is left to just be an observer with no ability to decide or make choices. Of course as an individual they have to fight all their battles alone and the large groups can slowly wittle away at them. So people in isolation in certain circumstances become very great in strength. Some people in history who were all alone accomplished great feats that groups would never be able to accomplish just because as the group size increases the options an individual has decreases,

The smartest one was rather young in age and he was about 18 and he had an accident that hurt his back and so then he started taking pain meds and that is perhaps how he applied the remedy and so then a couple years passed and it the same story for some , and he became aware of the situation and so one day he went to the gun range and got instructions on how to fire the weapon and he the gun range owner said he fired a few shots and then shot himself in

the head and that what everyone is up against because there are a couple who took some very similar aspects of that as far as leaving early so to speak and so he is the smartest one and everyone else is just hesitant or postponing the reality, and I do think it is because of fear I think it is because they are ghosts that are trying to correct a perceived problem what would be known as vengeful ghosts or restless or wandering and unable to pass on ghosts. I think what is also happening is they perceive they are trying to solve some problem or avenge some situation when in reality they are unable to do that so they are just harming their self and that is relative to the fact they are ghosts. Like the story where some unjust thing happened to a ghosts that caused their death and so that ghost wanders around trying to rectify or reckoning that situation but in reality that "event" IS BURNED INTO TIME AND THERE IS NO WAY TO TAKE IT BACK BUT YOU CAN TALK TO THEM AND EXPLAIN THIS TO THEM BUT IT DOESN'T MATTER BECAUSE THE ONLY ARGUMENT YOU CAN EVER MAKE TO THEM IS TO MOVE ON. If you convince them that event of their death was just a even in time that cannot be corrected then they are forced to move on and accept the fact they were treated wrongly or unjustly and then they can move on, but many and in fact most will not accept that reality because you are not dealing with a person you are dealing with a person who died in a perceived or even literal event. Some goals they tend to have may not have anything to do with the living aspects and so do. It seems like some

goals have to do with bridging this gap in this vicinity between the living and the ghosts, and make it all one thing, with no separation. So if the problem is the ghosts aspect is hidden then the solution would be the ghost aspect is no longer hidden but this perhaps would have issues with the living because not only are they perhaps afraid of ghosts they may also be afraid of becoming one and also they got the marks so they are perhaps also not thinking clearly to begin with. One group I met are strictly non talkers and they are strictly business and no talking. This perhaps has advantages but also perhaps whatever goal they have may not be so understood. It like many ghosts with various objectives. I don't think any of the objectives have anything to do with making the world a better place because with the marks all over that perhaps isn't even a possibility, so they go down a few rungs or down a few levels below that and then pick a goal to accomplish and this affords them a reason to not pass on. And this perhaps is issue that is odd. Because the tribes apply the same remedy on their three olds and they just go on with life like its no big deal but someone because of the marks which is an injustice in reality and many are angry ghosts at the core level and so they wish to stay around to inflict some kind of payback.

Hypothetical War Plans Against Order

In an order system there are only two main players.

Those who give orders and those who follow orders.

It seems easier to take out the order givers than to go after the order takers

Because it seems there are more order takers than order givers in an order system.

a) chaos versus order has major troubles because it has to appear to be a part of order

or it has to leave the order system and then its an obvious target. So chaos has to

fit in the order system. So a great deal of chaos's time is spent trying to pretend its

a part of the order system.

b) Chaos(order) versus order. Chaos(order) means that a general command is given that is the (order) aspect

but chaos is how it is carried out. A hypothetical example of this would be 9/11. The targets were the twin towers(order)

but the plans came from chaotic angles. Kamakazee planes are also an example of this. So perhaps chaos is also order just not an absolute

order system. An absolute order system is there is a general and 100 soldiers and at no point in a battle does a soldier

tell the general what to do and at no time does the general not tell a soldier what to do. Absolute order system is essentially a slave system but if the soldier is getting paid then its a job. So it seems like a slave job. But also it seems the general is also following order from the country leader so that general is also at a slave job position. So then that countries leader is also perhaps at a slave job position until there is some sort of absolute leader resolved. This absolute leader may be a group. "Out of many one" indicates an absolute leader with many heads. "Every man for himself" indicates chaos. "women and children first" indicates order." women and children first" is also a battle plan. If the men are the strongest then "women and children first" suggests the battle plan is to take men out of the position of strength. "We have your women and children what are you going to do but bow" perhaps.

So order versus chaos , it appears chaos always will lose because order is organized. So most wars have been order versus order except for the battles against indigenous and some of those were chaos versus order. The native Americans (many tribes)=(chaos) versus Americans (order).

Of course it seems nature is chaos on a big scale or a small scale and order always loses to that. Nature does not seem to be chaos on a moderate scale. A herd of animals or a school of fish or a flock of birds appear to have a certain order to how they travel. As technology dissolves

advantages between factions dissolve. If technology is uniform between factions then advantages dissolve. At an absolute technology level its probable one faction could have just one member of its army and defeat a huge army several levels of technology below it. Since reading writing and math actually alter the perception of the young students by favoring the left hemisphere, and the actual fact that tribes that don't get the "good education" do live in harmony with nature to the extent they can "last" thousands of years without much of a noticeable difference to the environment, if a person in civilization actually got the education and the mind altering aspects, they could not ever live in harmony with nature or respect the environment because that would mean the education conditioning didn't work. Or another way to say it is its impossible to have a tribe person without the education conditioning act "normally" and a person with the education conditioning "act normally" also, so the issues in all of civilization are not issues relative to normal mental state but in fact are issues relative to symptoms caused by the education conditioning mental discrimination. To simplify you can drink a bottle of vodka and expect to act like someone who did not.

11/3/2015 6:36:36 PM -

I saw this sign at some church and it said "Faith is living without scheming" So if you look at it and just read it it seems like its a "good" feeling generally speaking. It makes the reader say in their head "yes that is true and real and i

feel better" But if you break it down to what it perhaps actually is, a number equation you can perhaps see why it says that.

So one level its just an obvious level. Its this.

(good number) + (good number) - (bad number) = (Good number)

so if you want to be more specific...you can attach actual numbers.

faith = 100

living = 90

scheming = -80

the minus sign is the word "without"

so $100 + 90 - (-80) = 110$

So perhaps the feeling a person gets from reading that "saying" is because its a positive number so you get a positive feeling that makes it appear like the speaker of the saying is "wise" or "smart"

So lets just exchange words with close to equal value but in a non "spiritual" realm.

Diamonds is living without debt.

so diamonds = 100

living = 90

and debt = -80

Same exact equation and so the person who reads that may say what you just said is "wise" or "smart"

but only because the number in the end of that "equation" is positive. The actual reality is generally speaking, relative.

War is living without scheming.

That may not make any sense sounding but if you look at the number value

war = -80

living = 90

scheming = 80

so its $-80 + 90 + -80 = -70$

so it seems like it doesn't make sense or is smart.

but if you see it differently.

If it's world war 2 then war may be a positive number.

So some political slogans may be, "I bring change"

change is relative, if the economy and other facts are good then that comment sound unwise or bad. This is like floating point math.

"We need change" if thing are going well, then that's a negative number equation and if thing are going "bad" that's a positive number. So that's a floating point equation with a floating point number. Its not words its math.

"You look nice today"

"You" is perhaps a big positive number in this equation. But its because of the "numbers" at the end of that equation.

"nice" is a "good number" say +70 and today is a zero number.

you = 200

look = 0

nice = 70

today = 0.

270

so you may feel "happy" about that comment but only because the numbers register positive in your mind.

As "nice" increases in value your overall score is increased.

"You look excellent" = high positive number = nice feeling

"You look shitty" = High negative number unless said jokingly

"You smell terrible" = High negative number

So this mind is reacting to number equations.

11/4/2015 6:59:47 AM - an action or strategy carefully planned to achieve a specific end.

a plan of action or policy designed to achieve a major or overall aim.

so the main tactic is to confuse the being to the degree they forget who they are and the strategy of course starts with education. Alter perc eption with the favoring of a hemisphere in the child and so the child becomes confused and so the overall strategy is the being is confused. If a person thinks they are anything other than what they are then the strategy has worked and in this case the person factually is a member of a tribe and at this stage that tribes like most tribes on the planet have been splintered to the

degree the tribe itself no longer exists so the overall strategy is to make sure the person is disassociated with their tribe of origin. Since the aspects relative to this strategy are ruthless and in their goal anything goes no matter what it is simply because they have absolute control, that tactic must also be adopted. In the end anything goes no matter what it is because there is not a winning possibility only abilities to make dents to the overall strategy.

so the open aspect that is considering is that aspects may think that this or that is perhaps the scary or dangerous aspect and so that perceived scary aspect would be a factor in their behavior although one thing to perhaps consider is these younger brothers and sisters spiritual aspects that may be encountered at some stage in forever infinity and that child spirit would be immediately aware that you were perhaps aware of some sort of out so that they would perhaps not have had to go into forever infinity believing soundly that whoever made them ruined their mind to the degree that they decided to check out when in reality it was the education conditioning that caused the perception disorder and that led to them determining to check out because of some trivial matter in reality that they would have not decided to check out as a result of without conditioned perception reality. some one would be facing that child spirit aspect and that aspect may deduce that you

were aware of that situation and decided to be safe from some other perceived danger and opt out of explaining it to them and so now you are facing them and they are aware of the reality and your decisions and it would perhaps be some sort of ultimate dissatisfaction that a being would be confronted with the actuality of their decisions. Their decision to avoid one perceived threat and the reality that that safe decision considering who they are facing now, was not a safe decision at all, in fact the perceived threat was not a threat in contrast to the threat they are facing now. And so attempting to be safe works initially because a being perceives they are safe but as the scale of infinity is unpredictable a safe decision today may be perceived as a fatal decision tomorrow on the scale of infinity/ Would you rather face a spirit child who is in the scale of inanity or a **PERCEIVED THREAT THAT IS IN THE SCALE OF LIMITED EXISTENCE**. this is perhaps how some people see things. If your safe now you will be safe forever. or if you made a decision today that effect will carry on into infinity. Swimming in the ocean in a certain spot today may be safe but on the scale of infinity sitting in that spot at a later date may be fatal. Child spirits who are angry cannot be reasoned with no because they are unreasonable, but because the argument with the child spirit usually relates to why it was okay to make that child spirit angry to begin with.

one perhaps obvious goal of education outside of the obvious main goal that is perception altering through repetitive tasks disfavoring one hemisphere or favoring one

hemisphere, is to convince the student of a scale of intelligence or awareness of a situation and then once that is achieved it is easy to push the student to accept their position in a group of people. If a student gets a 60 on a spelling test and 10 students get a 95 on the same test in the same classroom then that student after repetitive testing will be convinced that those students who scored 95 are factually more intelligent and will treat or act a certain way around those students accordingly including envy and admiration aspects. This can be transferred to any situation in life as long as the student is convinced they are not intelligent as most then they begin to live like that and that is one aspect of civilization that is a tool that keeps the system going. So the pecking order in civilization is good is at the top and the most evil person of all is at the bottom but these words of course are reversed in reality because of the reverse thing. That means the most evil is at the top and the most good is at the bottom./meaning the most good person on the planet is well alone somewhere and generally speaking no one will ever meet them or if they did they would see them as worthless, stupid, and the most evil person in the world they would see them as intelligent wise rich smart wealthy and powerful. It's like the girl I read about who was in a foreign country and she was helping the needy and she was about 18 or so and she wrote on her website that she was happy to be doing what she was doing helping people in this third world country and that was the last post she made on the net, if you are on it you are in it, and he

thru art waxes slight shortly after that. no deed goes unnoticed. but in this system of civilization it is not important what side you are on in reality because the system itself is failed a failed system. being good in a failed system is the same as being bad in a failed system and ignoring the system is the same as noticing the system and idolizing the system is the same as hating the system so the only side there really is that is acknowledge in the system is destroying the system would be the only competitor to the system because every other side is in fact, helping the system. and the saying faith is living without scheming is actually impossible to ever achieve it is like saying not reacting to reality means you are smart, or not facing reality means you are religious. not noticing the girl staring at you with a smile on her face means you are wise. its a non-sense comment that is impossible to achieve. no scheme is a scheme. no plan is a plan. Deciding to not notice means you are reacting to the fact you have noticed and acted upon it. not caring means you have decided to act in a way that prolongs your situation and that is a symptom you do care. Caring to obviously means you have decided to out yourself and thus as far as yourself you do not care. absolutes cannot happen because if they could happen they would swiftly eliminate their self because of the environment. if one decides to always be good then whatever that criteria is, they will eventually encounter a situation that they cannot always act like that so accepting that challenge

means a person is concerned about whatever being bad is.11/4/2015 10:09:31 AM

most attempts to find a cause for the system ends with the seeker finding that an inanimate object is to blame reading and math , and so they must seek to find something less to blame and that's where perception lies. is it the school teacher in kindergarten or the school teacher in high school more to blame or is it the system itself that requires money so people have to get a job and sometimes they decide to get a job as a math teacher or English teacher. so then the money aspect to live becomes the issue but that is a deeper symptom of numbers so numbers are inanimate . settling is harsh. Four in a row Joe, showed us how to go, way against the flow, so few ever show, fuck the boat just row. make an operating system thats just an operationg system with no other programs at all then have tons of programs you can add to it.

disk and computer drivers

and thats it.maybe drivers for perfiles

chasophobia: nown: fear of the inability to detect discernible patterns.

11/5/2015 10:28:05 PM

ed + (mt + re) = Kn = Ci

Gen 1:16 And God made two great lights; the greater light to rule the day, and the lesser light to rule the night: *he made* the stars also.

Gen 1:26 And God said, Let us make man in our image, after our likeness:
and let them have dominion over the fish of the sea, and over the fowl of
the air, and over the cattle, and over all the earth, and over every creeping
thing that creepeth upon the earth.

[he made] and [Let us] = confusion = none monotheistic

[make man in our image] = experiment

how?

Gen 1:27 So God created man in his *own* image, in the image of God created
he him; male and female created he them.

[created man in his *own* image] = experiment

how?

[..our education system, as well as science (tools of science are math and writing/ dena and demotic , respectively) in general, tends to neglect the nonverbal (intuition, creativity, the soul) form of intellect. What it comes down to is that modern society discriminates against the right hemisphere.] – Roger Sperry (1973)

= break whats not broken then fix it and get credit for fixing it

= like some rto9w truck drivers will lay stuff in the roaed out in the middle of no where and cars run over it get a flat or two0 then they get a call to "help them" and the people in the car think "it was lucky and good fortune that this guy was here to help us" thus turning something that is dasterdly into9 something that is a blessing.

break + fix = gradification where none is deserved

[make man in our image] = personality trait

1. seeks acceptance . why? unacceptable to man. Humans would not like this thing on its own merits so it developed a strategy to gain acceptance.

break + fix = acceptance

2. [science discriminates against the right hemisphere.] = break the mind, then fix the mind, then acceptance. Thank you for breaking my mind and then fixing my mind I accept you. =

Battered Person Syndrome

- The abused thinks that the violence was his or her fault. [science discriminates against the right hemisphere.]**

- **The abused has an inability to place the responsibility for the violence elsewhere.{science is what separates the tribes without education from civilization} Abused can't blame civilization it would be suicide.**

Personality trait 3: Deep protections. Complex defense.

- **If you complain about [science discriminates against the right hemisphere.] = break + fix = acceptance, we will send all these aspects from civilization who we have abused and have accepted us after you. Thus the comment (forgive and forget)or (let it go). These are not concepts that are valid except within civilization. Its like forgi9ve and forget is great if someone hits you or says bad words to you, but its not valid for every situation ever, but propagation of this concept is used as a tactic. A tactic devised by**
- **[And God said, Let us make man in our image]**

One comment is Faith is living without scheming.

Scheme : Break + Fix then acceptance.

What do you do with aspects that say that education messed me up? [science discriminates against the right hemisphere.]

Scheme : Coverall concepts - Forgive and forget, it is human to error and devine to forgive.

- **Scheme: if you want to be divine you should forgive being mentally abused by [God] [And God said, Let us make man in our image] = [science discriminates against the right hemisphere.] = tree of knowledge**
- Scheme - If you don't forgive, then you are evil. Make the abused believe or perceive they are the reason they were abused.**

Battered Person Syndrome - Battered Person Syndrome

The abused thinks that the violence was his or her fault.

- [The abused fears for her/his life, and/or, the lives of loved ones whom the abuser might or has threatened to harm (e.g., children-in-common, close relatives or friends).]
- if you don't forgive like your parents did they may disown you not because they are divine but because they are [Gods children]

So this experiment started a long time ago0 negated the parent child unspoken contract and destroyed mankind because it destroyed the family. This God put itself between the parents and children and so if the children do agree to being abused if they survive the parents are already inhabited. If a child cannot trust there parents on a civilization scale then there4 is no families, just enemies who will do whatever it takes to make sure you either join them in destroying the family and thus civilization or they eliminate you. Relative to - 1. seeks acceptance . why? unacceptable to man. Humans would not like this thing on its own merits so it developed a strategy to gain acceptance. break + fix = acceptance + be my friend + now your my friend you may have to harm your children (education) and if they don't (see the light) you may have to help us eliminate them.

God trait : Highly intelligent militaristic strategist, conquest, conqueror.

To lay this out as a human military.

It would be like country A dropping a deadly chemical on country B. Then country A moves in and provides the cure. Then country B accepts the cure and Country A is our friend. And anyone in country B that says "no they dropped the chemical they are tricking you" would be eliminated by members of country B that befriended country A. = complex psychological, fear of harm strategy, fear for life strategy. So the "we are all good" concept or "we are all Gods children" applies to everyone but the tribes who are not a part of civilization and thus the master servant aspect is relative to "God" being both. This "god " can be a servant or a master, so its always wins if you play that game and if you dont play that game you have "all gods children" after you. Thus the concept "its rough all over" meaning {God} is a master tactician but not a tactician that cannot be understood or known thus not an undefeatable tactician.

a paranormal investigator meets some people and befriends them because they are also interested in paranormal investigation but it turns out they

are really ghosts and in turn do certain things to lead or enable that paranormal investigator to also become a ghost and then the ghosts believe they have a nice toy or a nice tool because they neglected to consider why that paranormal investigator was looking for ghosts in the first place.

Mark arrangement X-03 :

"How to become a ghost with a pulse(really)

"Hypothalamus - activates "fight or flight" response

After the left brain conditioning this part of the brain is not functioning properly on a thought level. Physiologically it looks fine but it is not function properly. The Abraham and Isaac story is about Isaac not running, which is the flight aspect of fight or flight, when he saw that knife held over him. So Isaac submitted when this Hypothalamus was telling to run. Isaac chose to lose his life and thus preserved it. This is a mental technique to get this Hypothalamus working properly again. So in the East the strategy is to sit in a cemetery and meditate and this Hypothalamus is going to be sending lots of signals that tells a person to flee and they are not going to flee, and this silences this Hypothalamus and that means it starts function properly again and is not so hyperactive. This is what self control is.

This Hypothalamus is telling a person to run like the wind, a ghost is coming to kill you and then one applies self control and does not run and so they stop these false signals coming from this Hypothalamus and it starts working properly again. So all these years of left brain sequential conditioning has made this Hypothalamus start acting strange and that effects the entire mind." Demotic page 164 Volume 10

"One has to get the hypothalamus to give them the strongest signal it can give, the perceived death signal and when it does just ignore it or pay no attention to it." Anathema -Vol:18 Page 283

"Sitting alone in a cemetery at night mediating. So one is sitting alone at night in a cemetery and their Hypothalamus says "Run like the wind, ghosts of death are coming" and one does not run like the wind, they fear not and also do not fear death.

The trend in relation to Abraham , Buddha and Socrates is they are simply human beings that that applied this fear not and then that Hypothalamus started working properly again and that also reverted them back to mental harmony or sound mind so they negated this extreme left brain state the written language education put them in. So this sequential education alters the mind to the left and also turns up the Hypothalamus so one is prone to fear and the remedy is to deny the signals of that Hypothalamus and that knocks the mind back into harmony.

Jesus came along 2000 years ago and said this:

[Luke 17:33 Whosoever shall seek to save his life shall lose it; and

whosoever shall lose his life shall preserve it.]

He used the word life instead of death. He could have said, whoever shall lose their fear of death preserves it. Or he could have said ,whoever runs from perceived death shall lose it.

Whoever runs from perceived death shall lose it; whoever shall lose their fear of perceived death preserves it.

Isaac did not run from death when he saw that knife over his chest so he preserved it which means he broke the curse or he knocked his mind back into harmony.

Mohammed came about 1500 years ago. He spoke of a Monotheistic faith and he used these names as references Noah, 198

Moses, Abraham, Jesus. What this proves is he read Genesis and he also read what Jesus said and he agreed with what they said and Mono means one and one denotes wholeness or holistic and that means he simply took what they said and said it a different way. None of the beings in this area of the world could speak about Buddha or Socrates because they didn't even know they existed and visa versa." - Demotic Vol: 10 page page 197

"Abraham and Isaac story can put all of this together.

What did Isaac do when he saw that knife held over him and perceived his death was imminent?

Fear not. - Abraham

What did Isaac do when he saw that knife held over him and perceived his death was imminent?

No fear of death. - Socrates

What did Isaac do when he saw that knife held over him and perceived his death was imminent?

Not afraid of ghosts or perceived death – Buddha

What did Isaac do when he saw that knife held over him and perceived his death was imminent?

Whosoever shall lose his life shall preserve it. – Jesus

What did Isaac do when he saw that knife held over him and perceived his death was imminent?

Submit (to perceived death). – Mohammed" Demotic volume 10 Page 198

Situational Awareness is the ability to identify, process, and comprehend the critical elements of information about what is happening to the team with regards to the mission. More simply, it's knowing what is going on around you."

Very cool. I couldn't agree more. Enlightenment is often described as a sort of "ego death". There's a quality to people like these who regularly practice "dying" (meditation has been said to be a process of practicing for one's own death) which makes them totally Free and unable to be controlled or coerced to do things contrary to their personal morality. I think it was the biblical Paul who said "I die daily". The New World Order is terrified of these people, and does everything they can to keep the humans in fight or flight and in deep fear. Once the fear of death is faced and left in the hands of the Supreme Being, and the fruits of our actions left up to the ruler of the Universe, resistance to what IS disappears and we can surrender to the will of God. Not my will, but Thy will be done.

Great post.

Didn't read.

This is reality.

Result= (CondEd + trau) +(fer) +(immeniDom)

HC = (max) + (notol) + (sil)

once there was a pcg party study this study included over 500 people and took place in vast outdoor area mixed with fixed housing in an unmentioned location conducted by the scientific group to study the effects of long term pcg study. Initially the study was a rough start some of the participants

where not to pleased with having daily regular pcP injections but this was later reduced to a patch. After a few weeks the short term mania and absolute occation "mental collapse" went away and the majority started to remain calm in mo0st situations to the degree that some actually started assuming leadership role in arranging outside farming and crafting situations and some of course assumed the oles of subservient cooperators of these leadership in this "pcP party". Although most were provided with outside tent areas many started to9 make inside shelters and some were rather fortified with few windows to ensure other pcP party participants were not able to observe them some actually created essentially bunker type structures and there slowly at about month 3 to have rules. Some of the leadership were allowed to do nearly anything and some of the sub servants were not allowed to do many things and so this leadership group up tended to have leadership meetings. Altho9ugh there were childr3en allowed to be present with some of the pcP party parents they of course were treated normally relative to the pcP party but essentially were not but abused. Some of the participants at the "party" become disenfranchised or certain mental aspects have achieved a level where they do not want to participate so they become isolationiosts or recluse appearing as that is a symptom of the "party" they feel they cannot function in the party structure. So in showing inability to function in the party section they become mentally isolatioonsist from all events of the party. They

perhaps are correct in their thinking, they perhaps are attempting to leave the party and that is how² they approach it but in the situation of the party there is no exits so what they inadvertently do is outrun their self to the rest of the party as ones who appear to be "unable" to handle the pc party, and so they are deemed weak or unwanted, for demonstrating symptoms of inability to function in a party that cannot possibly end well. thus they are strong because they are showing a sense of leadership in a situation there is no real leadership. Can there be leadership at a pc party or can they just play roles that are artificial. Can someone on pc ever demonstrate behavior of how they were before the inclusion in the pc party. It would perhaps be an anomaly and thus perhaps be a trait that is perhaps unwanted.

The bear theory is based on the reality that a mother bear will behave unlike a mother bear when her children are being harmed so this aspect compounded with the remedy aspect as well as the over a period of time perhaps thousands of years it could perhaps create something that would appear to be some sort of rage thought form if examined from a microcosm point of view (remedy aspect) + whatever personality that mother bear takes on when cubs are threatened + thousands of years + million of females exhibiting that aspect relative to the apple pie = a thought form of vast anger and rage unable to

do anything but exhibit the behavior of that motherbear when her cubs are threatened. Manufacture thought form as a result of collective mental trauma with the unknown aspects relative to the remedy.

x = how a mother bear acts when cubs are harmed.

b = unknown aspects of the remedy

g = factor in on a species wide scale.

x + b + g = manufactured thought form with the traits of "qanger relative to X

forzen in time.

It would be like meeting someone and doing something that made them angry then you freeze that personality for thousands of years. A manufacture personality with unknown factors relative to the remedy so its a manufacture anger thought form. Relative to "creator" or "creation". So being kind to this anger thought form would not work because the core creation aspects "harming the cubs" is not address and on another level.... the anger thought form itself may not even be aware that's how it was created , the thought form itself may be consumed with its personality , anger rage, desire to protect the cubs. Like the mother bear who when the male approaches the cubs that motherboards mind has a program that kicks in and that mother bear goes from nurturing will do anything for its cubs to protect them to this rage fill fighting personality. That personality appearance is isolated and frozen and maintained and thus

the mother bear appears "mean". In theory this mother bear anger personality is beyond correcting. Cannot ever correct it. because of the unknown factors relative to the collective aspect as well as the continuance of the cubs being threatened relative to reason for the remedy. One on level this perhaps suggests perhaps that perhaps there is not as much weight on a participants or even an observer's actions. Canada3 asked every squirrel in a 4.6 miles radius if it was okay for him to answer the door and they all said in unison and with vicarious nuts crammed in their cheeks "it's okay with us." Canada2 determined the safest place to move was 1/2 mile from my apartment. Canada1 informed a crowd of the best way not to do things and thus revealed the proper way to do things.

So back to the lsd party. The various factions that determined functioning and making the most of the situation had these conflicts that from their point of view made sense but from an observer outside the party there was no point, rhyme or reason to them at all. This perhaps was a symptom of the mental state. Perhaps relative to the comment "if you can make4 it here you can make it anywhere" meaning if you can function in one faction of the lsd party you can function in any faction of the lsd party. Relative to perhaps "what comes around goes around" if a participant embraces the lsd party lifestyle they may inadvertently influence another person who was isolated or shy about the lsd lifestyle. Some participants even suggested "its not that bad". This perhaps is a attempt to function or self

preservation statement. There perhaps are not aspects that would ever say that. That statement is perhaps a "flag" .

Creatures that can communicate perhaps never ever say "its not that bad" who are not at the lsd party. If someone observes "its not that bad" then they considered the reverse "its could be any worse" and then slowly bent that not based on there initial observation but based on exsistence. Perhaps after a week at the lsd party being injecte3d daily with lsd they may think "this cant be any worse" and then slowly after exsisting for 2 months they may bend to "its not that bad" but from an observers point of view after that first week its horrific and after the participants reach the point of think "its not that bad" the outside observer may perhaps suggest "its infinitely horrific. The outside observer is the baseline, the pcg party participants observations are nearly "things happening in the arena of the lsd party". Not opinions and not points of view and not information considered to be perhaps anything but simply symptom sounds that is a sort of motivational sound or grunt that has no meaning except tro the participants in the lsd party. "might makes right", that doesnt mean anything."Knowledge is power" that doesn't mean anything. 'Divided we fall" that doesnt mean anything. Its an lsd party, there are no lsd parties that have ever and will ever no matter how much a group tres that will turn out well. If an lsd party turned out well then that means the aspects that never took lsd parties to heart would be obsolete. If perhaps the personality of a group not in the lsd party was considered "original

programing" and the ones not in the lsd party were considered not original programming but "altered programming". The repercussions if the altered programming worked would mean the original programming was inferior and thus if the original programming was inferior there would be no altered programming aspects because the original program was flawed and thus there would be no survival and thus there would be no original programs to alter.

A = original programs

B = Altered programs (lsd party participants)

C = existence

D = No existence/ unable to cope and thus species dead end.

A + C = material to create B

A + D = No material to create B

Perhaps without the original programs strength then the altered program would not be. The altered program perhaps would not work the other way around.

B + C = A

this perhaps would be an incorrect statement.

Perhaps altered programs could not exist on the scale unaltered program can exist because if they could they would be original programs. On another level perhaps its not possible to take original programs and alter them and then

turn them back to original programs. If perhaps that was possible then there is no such thing as altered programs. Its perhaps not possible to recover the original once altered. This perhaps its the core of an important argument perhaps that suggests if the altering of original code is permanent than any attempts to reach an acceptance is perhaps a symptom of awareness that its irrevocable and thus meaningless.

If it was perhaps possible to take altered code and turn it into original code then it perhaps would not be altered code. Perhaps the choice is, looking at original code either do not alter it or alter it but the issue with that is, if altering all code then the control set environment is gone. Perhaps without a control set it is perhaps impossible to have an experiment at all. Perhaps without a healthy unaltered original code unaffected by the altered code aspects . completely pristine, then perhaps it is not an experiment or even a test or even a study, it is simply perhaps a massacre of original code. This entire train of thought may be relative to this "mother bear" anger thought form collective. That may also be intentional. Blind the mother bear with this rage and anger attempting to protect her cubs thus perhaps the mother bear is frozen is that rage, anger state and not only cannot protect her cubs because she is in a state of permanent blindness from rage thought form but she also cannot do anything but be defenseless because of being frozen in that stage. I used a comma in the last 200 words although it may have just been to mock you. Playing

command and conquer 3 on brutal setting is a great way to do stuff.

"head over heels" = "Left linear planning male over female , " relative to "money talks and loser walks, money is a linear aspect and what conditions to the left duringt school relative to math and thus head over heels means left over right , relative to society discriminates against right hemisphere - sperry. head over heels = left over right, male better than female, left better than right hemispehre, = uinsanity, al;so heirarchy relative to an or`der system. So this means i9f a person chopses either, they are slaves because a choice over right or left hemisphere is insanity, its nort real, its not possible to say left hand is better than right hand, one may say i use my right hand more than my left or i write left handed, but you need both to do pullups and you need both just as if it were a question like "i use my left lung mo`re than my `right lung" or "i p`refer m`y left lung to my `rigfht lunmg and so when i breathe i t`ry to only use the lung i like and neglect the othe`r. Its that kind of insanity.If one bases their exsistence on something insane they will become so. 11/22/2015 1:15:39 AM

Notaphobia: n; fear of words.

Audry parado0x : Beibg rweeudued if reality and that the same time not wanring to leave that reality,

Pragmatophobia

Any experimnet without a control set is called an extermination.

“ITS ABOUT US NOT YOU” = individuals are unwanted = people who can think for themselves are unwanted = hierarchy is the norm – facism or slavery is the norm. = doing it alone mentally is unwanted = individual freedom is unwanted.= group mentality means perhaps fear. Fear of thinking.

Ducophobia ; noun; fear of thinking

Relative to the mind elemental created by causing an emotion and then molded it into a permanent form caused by the spiritual element or remedy, So this anger or rage mental aspect is created by doing something that makes it angry and that would be the education on its offspring and so this also can be reversed and so it would be a mental aspect that is created the exact same way except the variables are switched, the doing something that makes it angry variable to doing something that makes the element aspect happy, and then that is frozen.. so these two aspects are both created as a result of the education, the education is the conduit. So simplified

Female + harm offspring(education)*(makes it angry) + remedy(ghost creation) = Angry “deity”

Male + harm offspring(makes it happy) + _ remedy(ghost creation) = Happy “deity”

So any aspect that is not a part of these two “created personalities” are outcasts or unwanted aspects, and that would be entities that are considered relative to the above to “deities” as “chaos” deities. Perhaps a side effect simple minded, elementary minded, “retarded” . That would be best explained by saying anything that is only capable of one speed “anger” or “happy” is lacking in emotional capacity relative to how the beings were born. Some are angry they are fucked and some are happy THEY Are fucked but they are exactly the same.

Arizona3 decided to have a farm in the desert and arizona2 decided to fertilize the4 gun range after a tough workout but it didn't last long farmer decided to hide away from everyone except the camera crew that decided to show up and observe his farming technique. Canada3 asked everyone in a 5 mile radius if they minded if he answered the door and everyone in unison said nothing. Canada2 decided to reverse all his advice he was giving people and in turn being an unwitting ally. Canada1 decided if she moved within 1/2 mile radius it would attend her get together. Ava tried everything in the book to keep prying eyes away but only made it pry more.

So the story of William tell essentially goes something like he had someone shoot an apple off his head and this is very similar to t6yhe story of newton but in his case and apple hit him in the head so with newton the mental jolt so to speak that caused the wake up was the trauma from something an apple, rthe cymbol of reading writing and math hitting him in the head but with William tell it's a bit different because the act of wsomeone shooting an apple off your head would create the proper fear to apply the remedy also.so with newton it was the trauma of being hit in the head with an object and with William tell it was the fear not of having someone shoot an apple off your head and not flinching or moving.

X = "What it comes down to is that modern society discriminates against the right hemisphere." - Roger Sperry (1973) Neurobiologist and Nobel Lauriat

Y = "In humans, the frontal lobe reaches full maturity around only after the 20s, marking the cognitive maturity associated with adulthood" - Giedd, Jay N. (october 1999). "Brain Development during childhood and adolescence: a longitudinal MRI study". Nature neuroscience 2 (10): 861-863.

**Z = " If you reflect back upon our own educational training, we have been traditionally taught to master the 3 R's: reading, writing and arithmetic -- the domain and strength of the left brain" -
The Pitek Group, LLC.
Michael P. Pitek, III**

**A = extreme left brain mental state neurosis caused by Y and Z
B = The remedy to negate A
Because of Y, education which is Z hinders the mind of the children and that is why X was suggested**

**So now its perhaps possible to make some sense of certain messages from the past.
So now if we take the story of Newton and fill in some variables with the above information**

New was sitting under a tree and an apple hit him on the head and then he got ideas.

**[Under the tree] = under the influence of education or (Z)
[apple hit him on head] = a form of trauma in the area of the head
[then he got ideas] = the trauma undid the damage caused by (Z)**

The William tell story is : Someone put an apple on his head and then shot it off with an arrow.

**(put an apple on his head) = got education or (Z)
(shot it off with an arrow) = fear not form of remedy. If someo0ne was going to shoot5 an apple off your head with an arrow then you perhaps would be mindful of death or at least consider they may miss.**

So the two stories here are told by aspects that had applied the remedy either from having some sort of mental trauma or due to facing their fear of death. The end result is the same although the methods for achieving it are different. One is caused by some sort of mental trauma like being hit in the head and one is caused by a physical being afraid to the extreme and not running, or mental suicide.

"it's the thought that counts" is perhaps relative to behavior using certain aspects of the brain or mind. So if a person perhaps says I want to help that homeless person that thought is using a certain aspect of the brain and if a person says I want to insult that person or say mean things at that person then that also is perhaps using a

certain aspect of the brain or mind. If you think about doing something that is equal to doing it, perhaps. That's a slippery slope perhaps.

“A graceful decline would require leadership. Therefore I strongly suspect we'll decline catastrophically.”

Guy McPherson

Gen 1:1 In the beginning God created the heaven and the earth.

(heaven and the earth.) = Levels

Non-matter and Matter

Air(water) and earth(fire)

Spiritual and Non Spiritual

Visible and non-visible

Positive and negative or visa versa

Extremes = No medium or non-matter matter

Nothing or all

Good and evil

Happy and sad

Up and Down

Black and white

Blue and Red

So this extreme is anti “everything in moderation”

“everything in moderation” = “Everything” is an extreme so the sentence could be

:Extremes in moderation = Anti (always and never).

If you say you are humble then you are arrogant because humility is considered a “nice” trait in contrast to arrogant.

So if you say you are arrogant you are really humble because saying you are arrogant is a hit to the ego and so if someone

says they are humble that's a positive to the ego and so that is arrogant.

Thoth is the literacy god. That's of course reading writing and math. That is the god of civilization. So there of course are many religion under the umbrella of civilization but they are also under the umbrella of Thoth, the literacy god. This creates a situation that it confuses what religion ever was or what religion was at the beginning.

Gen 3:3 But of the fruit of the tree which is in the midst of the garden, God hath said, Ye shall not eat of it, neither shall ye touch it, lest ye die.

Luk 17:33 Whosoever shall seek to save his life shall lose it; and whosoever shall lose his life shall preserve it.

This is an interesting anomaly because the first sentence is the literacy and the second is the remedy to the literacy and of course the number math occurs. So keeping in mind this was perhaps 5000 years ago it was scientifically shown to be an accurate warning.

Gen 3:3 But of the fruit of the tree which is in the midst of the garden, God hath said, Ye shall not eat of it, neither shall ye touch it, lest ye die. =

“ If you reflect back upon our own educational training, we have

been traditionally taught to master the 3 R's: reading, writing and

arithmetic -- the domain and strength of the left brain” -

The Pitek Group, LLC =

**= “What it comes down to is that modern society discriminates against the right hemisphere.” - Roger Sperry (1973)
Neurobiologist
and Nobel Lauriat**

The checksum in the above marks arranged in a linear fashion are identical. Those statements are all saying the same thing. It is possible that these people who made these comments were some kind of double agent. Become friends with those of the marks, literacy, and then prove something that reveals the marks are poison. It would be like working at a gun factory and then on the side you say things against guns. Or like working at a brewery and then doing things that work towards making alcohol illegal. Basically Sperry was a neurologist that studied the brain and then reported his scientific method used to study the brain will harm the mind of the children using it. On another level sperry was like repeating what was said 5000 years ago, Gen 3:3 But of the fruit of the tree which is in the midst of the garden, God hath said, Ye shall not eat of it, neither shall ye touch it, lest ye die.

In case you are concerned scientific studies have shown that not more than a million children die as a result of the literacy being taught to them every year.

**Benjamin Bowling (12) died by hanging
Ariana Larsen-Skubbe (12) committed suicide by hanging
Simon Murski (12) allegedly took his own life**

So the above statement. Gen 3:3 is saying if you play lab rat experiments on the children you are going to have blood on

yours hands, and we all do don't we? This is certainly not reading writing and math, but that's another story. Who are you going to call to verify this? You know like sometimes these "terrorist" group blow up schools, now you know why. So religion was just some people who discovered the marks harmed the mind and they were against a population wide lab rat experiment. And although Abraham and Lot burned the cities of the Thoth, literacy god, down, 5000 years it's a safe bet that literacy has caught on. It's a nice experiment to ask people you know if they know that literacy has scientifically been shown to harm the mind and even cause death in some when it goes "bad" and it goes bad every time. That just conjecture. Train of thought. So religion started out as people saying doing that to our children is not okay and the Thoth god followers got of them and now we have civilization or the Thoth gods making based on marks, literacy. It's all Thoth. There are some that even resist 5000 years later because they have this thing beings get sometimes when they remedy the literacy damage, its called a conscience or a soul or a spirit or maybe its just revenge drive because ummm like a being without a consciousness would not feel anything unless they were told about the above three cases above. Unless they were told on a web site or something, they would not feel a thing ever about that. Although some have argued to let it go or let it be, they clearly haven't the slightest idea what they are talking about or they think they are speaking reality when in reality the only thing speaking from their mouth is Thoth. Don't check my facts.

Part 2

So the grouping of these marks :

Gen 3:3 But of the fruit of the tree which is in the midst of the garden, God hath said, Ye shall not eat of it, neither shall ye touch it, lest ye die. =

“ If you reflect back upon our own educational training, we have been traditionally taught to master the 3 R's: reading, writing and arithmetic -- the domain and strength of the left brain” - The Pitek Group, LLC =

= “What it comes down to is that modern society discriminates against the right hemisphere.” - Roger Sperry (1973) Neurobiologist and Nobel Lauriat

is not some vastly intelligent unreal comment6 its perhaps just like you saying “you shouldn’t give your child pcg because it may have some serious effect on the child.” It perhaps can also be relative to don’t mess with mother nature. So this thoth aspect is this perso0nality that is okay with risks and this religion aspect is more kind of like you can do many things but when you start messing with the offspring of the species you are dooming the species because the species wouldn’t have been here for perhaps many tens of thousands of years before the literacy god arrived if they needed to be improved. So religion is kind of like saying don’t make us lab rats and Thoth is kind of like this experimenter with us. See how far we can get but

altering the base mental state. So literacy bends the mind to the left and thus disables certain emotions and abilities that are there to start with. So there were these tribes that fought against this and so they were considered religious but not because they were so “religious” it was only a two way street. Expose the offspring to literacy or don’t. You can’t have numbers and base a system on numbers and then have the offspring somehow avoid numbers. If you are in civilization you know to count and that means this is actual “discriminates against the right hemisphere.” Although there is no study that has determined what exactly all the side effects are because it perhaps is not probable civilization/ Thoth is going to do a study on the adverse effects of its literacy on children. Many people do drugs in civilization to make their self feel better and that’s in part perhaps why they do drugs because this left brain state all that factoring causes leaves them sometimes in a state of needing something to feel better. It’s like they are aware something is not correct so they attempt to treat it unknowingly/ They like smoke pot after work and they say It helps me relax. They are not aware of this “discriminates against the right hemisphere.” So in some ways they are aware something is off but in that state of mind they cannot determine what it is. So they unknowingly address symptoms of the literacy. So the real challenge is trying to put yourself in that position after the religious “remedy” is applied. So that means the religion has this “sin” or “rule” and if you break it the rest of the stuff hardly matters because the remedy is like breaking the first rule, permanent. The first rule of religion is factually “do not get the literacy”

Gen 3:3 But of the fruit of the tree which is in the midst of the garden, God hath said, Ye shall not eat of it, neither shall ye touch it, lest ye die.

“Ye shall not eat of it”

If you break that one then as the movie “Constantine says “Gods punch line is a killer”. Perhaps you are thinking who would do this to me as a child. Generally speak Thoth the god of literacy and knowledge. Its interesting that it appears we are getting more intelligent or progressing forward when in reality we are getting further away from that state of mind we had before literacy that would be labeled perhaps sound mind or with cognitive ability. So there has to be a way to somehow demonstrate this as reality to the ones who think this may be false or incorrect. All a person has to do is look at what happened to the humans that didn’t get literacy known as the tribes but that word itself is like an insult in civilization and it has to be because when people in civilization talk poorly about the tribes and say those tribes sure got it from us, they are factually perhaps talking about their self when they were born with a sound mind, and so they are unknowingly saying give me literacy when I’m born and bend my mind to the left and maybe in that state I may do something that to others seems like a “stupid” decision. I like the story I have about a friend I didn’t know well, I was dating this girl and he liked her or dated her and he saw us together at a party I was about 15 then and he went home and hung himself from a tree in the front yard. That’s how I remember him, Chris Bell, because I said to myself that was stupid , over such a stupid thing like this. And now I realize he didn’t take to the literacy very well. And so now I recall that and it hurts. I’m mad at him then I get mad at you, then

I become calm because I see Thoth. There is one group that may help you make some validity to this because perhaps it may seem unbelievable and that is understandable because you factually are not this person

“society discriminates against the right hemisphere.”

That’s not how you were born. Tailored thought patterns is how it could be described. You would not harm your baby brother and sister by doing this to them “society discriminates against the right hemisphere.” I know that’s a

fact because you were born with a sound mind with cognitive ability and there is no evidence that any creature anywhere at anytime would harm their offspring so they start acting weird and demonstrating behavior that more aligned with destroying their habit than it is aligned with long term survival. So these tribes with Abraham and Lot that burned the cities down were acting with cognitive ability because they were aware that this “society discriminates against the right hemisphere.” mark

arrangement checksum would lead us to where we are at.

Like when you hear any story like we burned down the forests and took this tribes land and are destroying nature or messing up eco systems. That’s Thoth, the literacy gods plan. So you may be considering well my parents would not allow anyone to do this to me. They factually perhaps per “society discriminates against the right hemisphere.”

perhaps are not your parents because you are correct your parents wouldn’t allow any harm to come to their offspring ever because no other creature ever, has willingly allowed their offspring to be harmed, in fact it’s just the reverse. Do you think a bear mother and father would allow you to come up and beat their cubs? What about a whale mother and father? What about a wolf pack? What about a lion pack?

You know for a fact you would be dead before you got off the second swing at the cubs. If you ran a test 100 times trying to attack a bears cubs you would be dead 100 times because you harmed that cub if you were just hitting with your hands. There is no need to run that test because you are aware of what creatures do when something threatens their offspring. So now you perhaps have to think why didn't my parents do anything when Thoth said I have to go to school starting at age of six?

There is only one possibility since they didn't defend you. Perhaps a bigger question is, would you try to communicate these things to me if you were me?

Think. Creatures with cognitive ability will always protect their brothers and sisters. It's impossible they wouldn't. It's doesn't matter what the odds are or how great the treat is if any. A bear will always defend the cubs no matter what because they have cognitive ability, they are playing with a full deck and only a creature that is not, wouldn't. It's like some sort of weird thing that happens except humans in many ways are far more intelligent perhaps the word is devious considering the vicinity. There is some word I wanna use. So Abraham and Lot attack and burned them down not because they were unconcerned they were perhaps just exhibiting behavior that is consistent with a creature that has cognitive ability. They were aware of what literacy would lead to. They were like people at this LSD party and they were the only adults and they tried to stop the lsd party from getting out of hand but the ones on lsd saw them as being worry warts or "mind your own business" kind of thing or saw them as a threat. Of course we are talking about Thoth. You know any crusades against Thoth? That gives you a pretty good idea of the field, Thoth.

Part 3

**So what this religion aspect really does considering the vicinity is gives a person with questionable mental aspects due to the early years of literacy. The literacy may alter perception and usually does and so balance or better yet grounding becomes off on a mental scale. So religion itself no matter what religion you are on based on this alone:
Gen 3:3 But of the fruit of the tree which is in the midst of the garden, God hath said, Ye shall not eat of it, neither shall ye touch it, lest ye die.**

Is a path way to ability to function mentally because once this decision is made you are aware of where you are at and where you stand.

So these marks :

**[“ If you reflect back upon our own educational training, we have
been traditionally taught to master the 3 R's: reading,
writing and
arithmetic -- the domain and strength of the left brain” -
The Pitek Group, LLC =**

**= “What it comes down to is that modern society
discriminates
against the right hemisphere.” - Roger Sperry (1973)
Neurobiologist**

and Nobel Lauriat

can result in this and does result in this :

Benjamin Parke (13) died from a self-inflicted gunshot wound

Kyler Foster (13) took his own life

Taylor Hutchings (13) committed suicide by gunshot]

Lets call that group of marks clause 11 (because from my finding I haven't found any suicides below 11 so it appears six to ten is the general safe range for education but after that it seems the mind starts having issues in making decisions relative to the circumstances.

So if you are okay with clause 11 then your religion is Thoth the literacy god and god of knowledge.

If you are not okay with clause 11 then you are not a part of the religion of Thoth the literacy God and god of knowledge.

Because of the nature of the situation relative to literacy "discriminates

against the right hemisphere." There certainly should be3 many people that agree with clause 11 and say those are acceptable losses for the name of thoth and literacy, not especially because they are correct but because the "discriminates

against the right hemisphere." Causes inability to draw reasonable conclusion based on the situation such as :

Benjamin Parke (13) died from a self-inflicted gunshot wound

Kyler Foster (13) took his own life

Taylor Hutchings (13) committed suicide by gunshot]

If you look at these cases they perhaps may be over things the majority would say “that was an over reaction”. Although the stresses at 13 are quite intense not because they are but because of the literacy impairment.

So there are two groups.

For clause 11 and thus for Thoth the literacy God who is the main player or “Hero” of civilization

Not for Clause 11 and thus against civilization “Hero” Thoth the literacy God.

That where you achieve stability on a mental level given the situation. You can just decide in your mind and then you have purpose and you have a goal bigger than yourself and you are involved in something bigger than yourself that factually spans at least 5000 years when literacy and Thoth “started” civilization.

If you are not aware of any of this you have to do a litmus test. This test is something you can do to verify certain things in order to validate it on your own without relying on anyone’s perception. Due to the literacy perception aspect no one in civilizations perception is flawless because they generally speaking all got the literacy that our` kind scientist Sperry proved is perhaps not the healthiest thing for an pre-teen to get involved with.

So the scene is two bears and a cub. Momma bear and papa bear and the cub whose name is cubby. Then there is a man that is carrying a stick/ The man carrying the stick walks up

to cubby and starts hitting him with the stick. Now your part is to determine how the parents react. That's the litmus test part of this.

Computer statements can if then statements.

If momma bear and papa bear attack the man then your parents are not your parents.

If momma bear and papa bear do not attack the man but sit still then your parents are your parents.

So to explain. You just substitute the bears for your parents and the cubby for you and the man with the stick for literacy.

They cannot be both. Parents defend their offspring. Non Parents do not. Or

Non Thoth parents defend their offspring from Thoth and Parents who are on Thoth's side do not. Perhaps it some kind of deal. Like if you want to be a part of my system it will cost you, your children. You may think that's harsh but I know three children that don't. So you pick your side and you stick with it because although each side has certain issues, neither side tolerates a traitor. You know what it to. I like that part in that one movie where the guy has this other guy in a tight situation and he says to him "If the path you took lead you to this, what good was the path?" Of all the articles on the internet you could have picked ...

Part 4

I didn't find out who said this but it leaves clues as to what the marks actually do to the mind and thus leaves clues as to the overall tactic used by thoth is. So thoth, hero of civilization, has a plan.

"The hemisphere of the brain that neurologically controls the left side of the body and is thought to control spatial tasks, musical and artistic endeavors, body control and awareness, and creativity and imagination."

You may think this is not about religion but in fact all there is happening is religion. If you are for clause 11 then you are for literacy and things that happen as a result of literacy:

Hannah Bicknell (14) committed suicide by hanging

Matthew Homyk (14) and Anthony Gill (17) both committed suicide after they were bullied

Mary Rocha (14) allegedly took her own life after she was bullied

So the only similarity between these troopers is they all knew how to count and thus goy literacy and these factors were relative to their end result:

"artistic endeavors, body control and awareness, and creativity and imagination."

Mostly awareness is the important one here . It indicates if you did get the marks, literacy then it is required if you want your mind back you have to apply the remedy.

http://www.liveleak.com/view?i=b8a_1448059630

Awareness is turned through the literacy so the literacy has nothing to do with intelligence or even IQ or even being smart. It's not education it's the marks of the beast but the aspect is perhaps just saying after the education the person is no longer a human with cognitive ability they are in fact something that exhibits behavior below what a

human exhibits. A human would see something being done to its brothers and sisters that causes this:

Hannah Bicknell (14) committed suicide by hanging

Matthew Homyk (14) and Anthony Gill (17) both committed suicide after they were bullied

Mary Rocha (14) allegedly took her own life after she was bullied

And they would react or they would be concerned or they would be sad, but if someone saw that happen to their brothers and sisters and were not affected or even notice it at all then they must have their awareness turned off or radar turned off. So some may say that is dramatic to be upset that that is happening to their yo9ung brother sand sisters but in reality Thoth usually gives advice that is not wrong it's in fact backwards. For example if you see this:

Hannah Bicknell (14) committed suicide by hanging

Matthew Homyk (14) and Anthony Gill (17) both committed suicide after they were bullied

Mary Rocha (14) allegedly took her own life after she was bullied

And realize this is the reason for that:

“ If you reflect back upon our own educational training, we have

been traditionally taught to master the 3 R's: reading, writing and

arithmetic -- the domain and strength of the left brain” -

The Pitek Group, LLC =

“(right brain) spatial tasks, musical and artistic endeavors, body control and awareness, and creativity and imagination.”

Then you can perhaps deduce that so0mething happened to these children mentally that when a situation happened in life

because their “awareness”[was turned off their cognitive ability was altered and so they reacted to a situation normally relative to their cognitive ability, but the cognitive ability was not “normal”. If someone says harm words at you and you go home and kill yourself it’s a symptom that your cognitive ability is off.

So Thoth in seeing that reaction to their cognitive ability being turned off may say “You’re a drama queen or your being dramatic” But in reality if you go outside and see a baby brother or sister being harm or killed and you just sit there and do nothing that drama, if you pick up a child and protect that child that’s not drama that normal behavior relative to a situation and reveals one must have cognitive ability, and the one who just sits there exhibits behavior relative to they don’t have cognitive ability working or, they do have cognitive ability working but they are afraid of what may happen to them if they attempt to stop their baby brothers and sister being sacrificed in a virgin sacrifice ritual. This song lyrics explain that accepting your baby brothers and sister having the mark put on their head and being sacrificed in a virgin sacrifice ritual, accepting that is the incorrect approach:

**“Crying parents tell their children
If you survive, don’t do as we did
A son exclaims there’ll be nothing to do to
Her daughter says she’ll be dead with you”**

It’s saying your parents how allowed Thoth to put his mark on you (literacy) are suffering greatly for that decision and please do not do that . that decision is the worst decision. Her daughter says she will be dead with you, and that conscience (daughter) says she will be dead with you” meaning left brain is the happy personality and sadness is the right personality and this girl is the right personality and is saying ‘I’ll act like watching my baby brother and sister being sacrificed’ is okay with me.” Be dead with you” Left

brain people who got literacy aren't aware this is happening so they walk around laughing and smiling and then they see this :

Hannah Bicknell (14) committed suicide by hanging

Matthew Homyk (14) and Anthony Gill (17) both committed suicide after they were bullied

Mary Rocha (14) allegedly took her own life after she was bullied

You may have gotten literacy and see that and say Those kids reacted weird to the wind blowing and they did it to their self so no skin off my back. When in reality those kids got educated using your text dollars and they died by your hand indirectly. But with awareness(right brain turned off) they can't understand or figure that out so they are "don't worry be happy". That's left brain only. This means sadness to the fate of the baby brothers and sisters if reaction is anything other than happy it may indicate a person has right brain working. If you are sad (right brain) to see your baby brother and sister sacrificed by Thoth the literacy god, then Thoth sees that as evil because Thoth (left brain) motto for living is "don't worry be happy" be happy even if I sacrifice your baby brothers and sisters in a virgin sacrifice ritual so I become more powerful; I and so you if you have a conscience and allow it to happen you slowly die, you conscience. So when you may see words or marks arranged in linear fashion to these marks and they say you are being dramatic, that in fact is Thoth, saying act left brain (no conscience or feelings) instead of sadness (right brain) logic reaction to stimuli presented. So it may seem people with left and right brain at 50/50 who have normal cognitive ability would always be sad, they are not they only get sad to situations where people with cognitive ability would be sad. So when you hear a leader in civilization, Thoth's world, say "what we need is the best education money can buy for our children" that's Thoth or something doing its bidding. Scientifically and this is odd , its been proven literacy may kill children by turning off their awareness and so that means even some scientists agree with religion from 5000 years ago:

Gen 3:3 But of the fruit of the tree which is in the midst of the garden, God hath said, Ye shall not eat of it, neither shall ye touch it, lest ye die. = Literacy may turn off your child's awareness aspect of right brain because it favors left brain and your child may kill themselves by making a decision relative to what they perceive is reality.

Kendall Boyd (14) committed suicide by hanging

They killed themselves because the wind blew essentially. Someone has to avenge their virgin sacrifice.

By the way there is one group I found that practices what has been preached and this one group from Nigeria their name means literacy is harmful and it appears they are following the Abraham and Lot method to letter(mark). Perhaps if you are okay with the baby brothers and sister dying after being marked you should say so, at least out loud when you are "alone" in your room just so it can be official in the vicinity so just say "I'm okay sacrificing my baby brothers and sisters in virgin sacrifices to Thoth the literacy god" Just say that out loud , only once is enough, and if that's how you feel you should do it, just say it once not so loud just in a normal voice and that would really help us out a lot.

Religion 5

One aspect relative to religion of course is determining what exactly is religion. There are many religions and many beliefs and outside of the meat and potatoes it appears these religions are rules that vary. The meat and potatoes aspect is simply not being okay with exposing children to the literacy because it harms them mentally and may kill them because it alters their perception. It would kind of be like saying to someone giving a six year old child a strong dose of PCP or LSD and then allowing the child to walk on a ledge of a high rise building. You perhaps would say giving them PCP is pretty messed up. That's pretty messed up to do that to a child. You may even not like that adult to do that to a child. You may even hate that adult if that child fell and died as a result of the adult giving them PCP. You may even take a serious interest in making sure that adult who did that to a child, suffers greatly. Most perhaps would agree that is a normal response to a stimuli experienced. For

example adults in prison tolerate many beings in prison but child abusers and killers of children are not one of those beings they tolerate at all. You may perhaps even think I am doing this to scold you or incite you to do something about the realities of what literacy can do to children because it alters their perception factually.

**Reid Adler (15) committed suicide by an unknown method
Elizabeth Mattera (15) took her own life
Chiedza Brown (15) committed suicide by hanging**

“The main theme to emerge .. is that there appear to be two modes of thinking, verbal and nonverbal, represented rather separately in left and right hemispheres, respectively, and that our educational system, as well as science in general, tends to neglect the nonverbal form of intellect. What it comes down to is that modern society discriminates against the right hemisphere.” - Roger Sperry - 1973

“as well as science in general” = reading writing and math the marks of the beast or the marks that alter perception and makes people act differently than they would.

So people not under the influence of any drugs or perception misalignment would not ever be okay with harming or killing children. It breaks the law of existence. If a species harms their own children then how does that species remain viable? It can't. If when baby ants were born the adult ants killed them or altered their mind so they could not function properly ants would not be. There would be no ants after a few generations and thus ants would be gone. That template can be applied to most creatures. So you may ask how do humans that do alter

and sometimes kill their children using literacy at the command of thoth the literacy god , how is it that humans are still here, that breaks that rule? We aren't here. We generally speaking, after Abraham and lots tried to burn down the cities of thoth and get rid of everyone in them, I think they spared a cousin who lived in thoths world, civilization, but eliminated the city and everyone else in them. They failed "us", us being human species. This scenario of course played out many times in history perhaps the most recent was when the 100 million or so native American's went up against thoth the literacy god who rules civilization, in the American Indian wars. So about 100 million native americans were eliminated by Thoth and his troops andf took control of America. That was essentially a reoccurrence of exactly what happened in the Abraham and Lot war 5000 years ago band also what is happening today in certain aspects that happen in countries where the "enemy" tears down or destroys schools or are against literacy. Thoth prefers reality to be confusion so reality looks like 1000 religions and 1000 countries and 1000 opinions and this keeps any form of cognitive ability to take hold. That's called a tactic. When confusion reigns thoth thrives. One religion suggests say away from intrigue. That's just really saying perhaps say away from confusion. One sad aspect perhaps is you may read this an assume the author is attempting to help you survive this situation. As youi read these marks that have been arranged you may feel emotions and if these marks get into your mind they will make you start wondering if perhaps that this mark arrangement is not reality:

"What it comes down to is that modern society discriminates against the right hemisphere." - Roger Sperry – 1973

Because if that mark arrangement is reality then this mark arrangement may be reality.

“as well as science in general” = reading writing and math the marks of the beast or the marks that alter perception and makes people act differently than they would.

Then you may wonder if this mark arrangement is reality:

Reid Adler (15) committed suicide by an unknown method

Elizabeth Mattera (15) took her own life

Chiedza Brown (15) committed suicide by hanging

Then you may deduce its probable that you are in thoths literacy cult and pay taxes to kill your own brothers and sister mentally or physically and in your state of mind caused by literacy you may deduce you have to get out of that situation or yo9u have remedy that situation because you are cool with many thing but not virgin sacrifices of your own brothers and sisters. And you may conclude that whoever would arrangement the marks in this fashion are trying to harm me or make me confused or trying to knock me off my high horse of what I thought reality was and make it so my entire perception of reality is starting to dissolve the more I try to think about this topic. You may even think the author of these marks is scary to you, or even an author you rather not read the mark arrangements, presented because this reality presented is not what I thought reality was or is. What the comment “pen is mightier than the sword” perhaps means, is that if you can find an aspect that can arrangement the marks in a proper way, it is far easier to destroy thoth or thoth mind or thoth being than using physical force ever is. Although the remedy has been presented thoth usually wont apply it because well that’s

thoth, so its perhaps best just to tell thoth something's relative to mark arrangements and in a period of thoth will take care of himself for you. Perhaps it could be suggested you apply the remedy suggested because some of these authors don't play games but perhaps you should just think about the marks you have just read are saying. Why are you thinking the authors of these marks are trying to eliminate you the easy way?

Jer_8:8 How do ye say, We are wise, and the law of the LORD is with us? Lo, certainly in vain made he it; the pen of the scribes is in vain.

“the pen of the scribes is in vain.” How can you say you are human and not insane when you allow yo9ur children to kill their self because they got literacy like you did? = How can you say you are intelligent when what you do, harming the big fishes fruit cups with the marks.= How can you say you are sane when what you do is insane. = How can you think you are safe when what you do is always fat6al. The authors suggest you stop reading his posts for4ever and if you ignore that, it's on you. Tricks are for kids silly rabbit.

Reid Adler (15) committed suicide by an unknown method = this one was a very nobel young man

Elizabeth Mattera (15) took her own life = this was a very beautiful young lady and she had great compassion

Chiedza Brown (15) committed suicide by hanging = this was a African American (TERMS USED TO DESCRIBE OWNERSHIP) = Tribe defeated by thoth = she has beautiful eyes and was full of creativity and emotion.

You better stop reading these posts

Part 6

Observations unlike reality are fallible.

Observations are fallible but reality is not.

If you read that you may deduce that its saying the same thing. You may even be able to suggest that the checksum of those two comments is identical. Necromancers don't teach they persuade. Someone asked me once if Im still trying and I said no I haven't started yet. So perhaps you are saying to yourself how can I trust an aspect called heimdall969 on the internet. The fact of the matter is you cant. You have no way of determining who heimdal96 really is even if you determine who the hands that type these marks in a linear fashion is. You are forced to use your right brain trait called awareness/intuition. There is this story I saw on video and there was this young kid maybe 18 sitting on a rock in afganistan with an ak-47, he had long long hair but no bear to young maybe, looking down on a road getting ready to attack whoever determined going down that road was smart band there was interestingly a news reporter from thoths side talking to him and he was aged and had a bald head and grey hair and he had is camera man there and was hold a microphone. Suddenly the kid with the ak-47 looked at the camera man and said " Our long hair scares you just as much as your bald head scares us." And I immediately thought to myself, that's not a grunt that a colonel or maybe a general. I thought it was funny even if you didn't. So observations can vary. So religion in some

ways splintered thousands of years ago because someone who was religious and against thoth the literacy god, decided that using the marks to speak out that the marks are bad news was proper based on reality. Its like making a child smoke a whole pack o0f cigarettes to convince them smoking is bad news. Hardcores don't buy that argument at all. So there is a split on that top, but both are concerned about their baby brothers and sisters. Hardcores not on thoths side are like a room with 1000 people on a stage and they are doing thing to get your attention and acting like they are tough or smart or cool with nice makeup and clothes and a variety of valuables that enhance that "im tough" persona and then a hardcore walks in and they all fall to the ground and can seem to stand up and cant even form a word let alone a sentence and the hardcore walks in as calm as a bomb and does its thing and walks out, and then the 1000 on the stage revert right back to how they were attempting to act like nothing happened. You cant explain them with marks. You eye pee attempting to. Y0ou say if I was like them I would be valuable= because they are thoths nightmare. Hardcore are so powerful you meet them and then you spend the rest of infinity trying not to think about them because they make every other aspect that fights against thoth look like nothing. They don't say a word ever and you could fill a mi9llion papyrus pages attempti9ng to explain them. Its like thoths army is so weak they have to hire soldiers to put on makeup and make noises on pretty costume sets so you never ever see the hardcore because when you see the hardcore and how Thoth troops react it makes me personally say mark arrangements such fuck you system that's says it okay to mentally abuse our baby brothers and sisters with your literacy and fuck your system

and fuck anyone who thinks differently. Now2 in case you are thinking this is observations you just have to research and make sure these mark arrangements are false. All you have to do is convince yourself in the whole universe the only thing that is perfect discovered so far is literacy in the face of these comments relating to literacy.

2Sa_20:25 And Sheva was scribe(for thoth): and Zadok and Abiathar were the priests(against thoth)

Luk_22:2 And the chief priests(thoth priest) and scribes(thoth) sought how they might kill him; for they feared the people(feared the people because the people found out what the literacy did to kids).:

Luk_23:10 And the chief priests and scribes stood and vehemently accused him. = Thothes troops doing what they could to make sure people said literacy is okay.

Luk_20:46 Beware of the scribes, which desire to walk in long robes, and love greetings in the markets, and the highest seats in the synagogues, and the chief rooms at feasts; = beware of anyone who likes literacy that a soldier for thoth and your children are on the menu.

[“ If you reflect back upon our own educational training, we have

been traditionally taught to master the 3 R's: reading, writing and

arithmetic -- the domain and strength of the left brain” -

The Pitek Group, LLC = double agent perhaps

“What it comes down to is that modern society discriminates

against the right hemisphere.” - Roger Sperry (1973)

Neurobiologist

and Nobel Lauriat = double agent for sure

**Talking about reality is simple because reality is obvious.
Im confident you are starting to become aware what the
penalty is for allowing someone to put the marks on you.**

http://www.liveleak.com/view?i=b8a_1448059630

**If yo9u are still confused it may be because someone did a
number on you.**

David Molak (16) committed suicide after he was bullied

Kyle Morgenthaler (16) took his own life

Harrison Mahan (16) allegedly took his own life

**So if you are okay with the literacy that kills some of your
brothers and sisters because of this “discriminates against
the right hemisphere.” Then all you have to do is say “I’m
okay that thoths literacy mentally harms my baby brothers
and sisters and even causes some to kill their self.” Out loud
in a normal tone of voice but audible, you can even do it
alone in your room. If you would just say that outlook if you
are okay with your baby brothers and sister being harm by
literacy that would really help us out.**

Fin
